

ABSTRACT

A process for producing a deformed image comprising the steps of:
digitally exposing a colour photographic silver halide material,
5 said colour photographic silver halide material comprising on a
deformable plastic support at least one blue-sensitive silver halide
emulsion layer containing at least one yellow coupler, at least one
green-sensitive silver halide emulsion layer containing at least one
magenta coupler and at least one red-sensitive silver halide
10 emulsion layer containing at least one cyan coupler; conventionally
processing said exposed colour photographic material to produce an
image; and deforming said colour photographic material.
